# 5 THINGS 5G CAN DO IN CASE OF ISOLATION
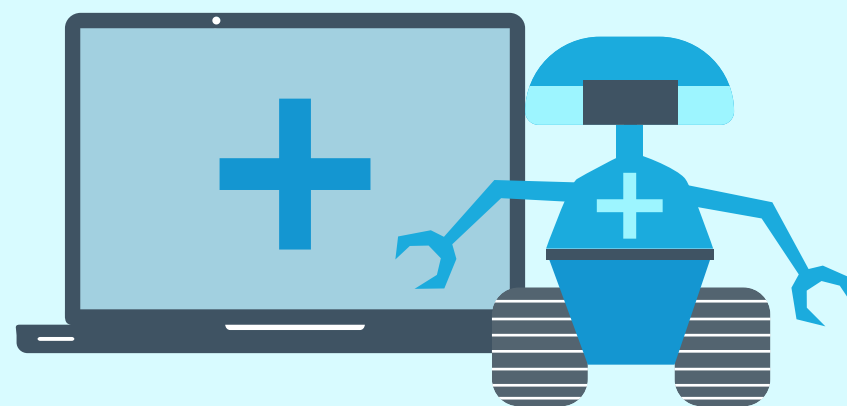

DRONES

Drones have been used for autonomous shipping and performing disinfection tasks by firing disinfectants in some locations in China.

WEARABLES

Health monitoring for prevention and early detection through wearables.
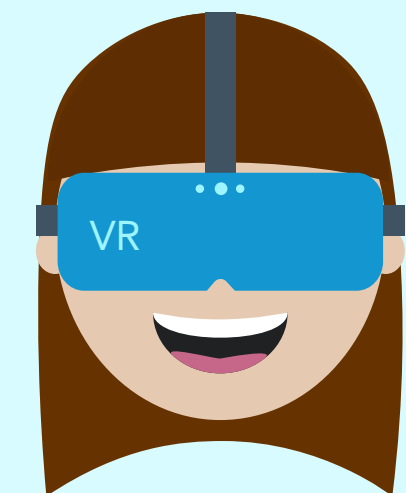

ROBOTS & TELECONFERENCES

Various hospitals in China have begun using robots and 5G teleconferencing to treat the coronavirus epidemic and prevent further spread.

COVERAGE

5G will improve coverage in crowds. Mobile and home computer connections have exploded with isolation. The 5G network can help the network not to crash

VIRTUAL REALITY

At leisure, Virtual Reality for remote visits to museums and cities.
